

Convection oven STEAMBOX electric 10x GN 2/1 touch digital boiler 400 V

**Model SAP Code** 00008606

- Steam type: Symbiotic boiler and injection combination (patent)
- Number of GN / EN: 10
- GN / EN size in device: GN 2/1
- GN device depth: 65
- Control type: Digital
- Humidity control: MeteoSystem regulation based on direct measurement of humidity in the chamber (patented)
- Advanced moisture adjustment: Supersteam two steam saturation modes
- Delta T heat preparation: Yes
- Automatic preheating: Yes
- Multi level cooking: No
- Door constitution: Vented safety double glass, removable for easy cleaning

SAP Code	00008606	Loading	400 V / 3N - 50 Hz
Net Width [mm]	1120	Steam type	Symbiotic - boiler and injection combination (patent)
Net Depth [mm]	845	Number of GN / EN	10
Net Height [mm]	1115	GN / EN size in device	GN 2/1
Net Weight [kg]	220.00	GN device depth	65
Power electric [kW]	28.300	Control type	Digital

**Product benefits** 

#### Convection oven STEAMBOX electric 10x GN 2/1 touch digital boiler 400 V

Model **SAP Code** 00008606

A symbiotic steam generation system

simultaneous use of direct injection and boiler, maintenance of 100% humidity, or its regulation

- preparation of different dishes and cooking styles in an environment precisely set for the food or dish
- **Digital display** simple multi-line backlit display of 99 programs with 9 cooking phases
  - help with cooking even for less skilled cooks, safe baking even in the absence of an operator; create your own recipes; easy to use
- **Weather system** patented device for measuring steam saturation in real time and in steam mode, the only one on the market
  - precise information for the operator about the steam saturation in the cooking area
- Steam tuner a control element that enables setting the exact

saturation of steam in the cooking chamber during the

- possibility of cooking different types of cuisine, from very moist steam for typical Czech dishes to lowsaturated steam for e.g. French cuisine
- Pass-through door the door is also built into the back of the combi oven, while full control is retained from the side of the cook enables the distribution of the delivery area and the kitchen
  - the chef can dispense the food through the convecto machine, the customer can see the preparation and maintenance of the food during dispensing
  - **Adaptation for roasting chickens** the chamber of the convection oven is designed to collect

baked fat, the machine is equipped with a container for

grease does not drain into the sewer, does not destroy the machine's waste system

A kit of two machines on top of each other

connection kit allowing two machines to be placed on top of each other

connects the connections, inlets, wastes and ventilation of the lower combi oven

- allows the user to place two machines in smaller spaces to increase production; the chef can prepare two different dishes simultaneously
- **Premix burner**

the only burner with a turbo pre-mixing gas with air on the market

the structure of the burner to V which prevents backfill and banging

This design saves 30 % of gas compared to conventional burners

- faster heat-up faster more comfortable operation
- **Automatic washing**

integrated chamber washing system possibility to use liquid and tablet detergents option to use vinegar as a rinse agent the system simultaneously descales the micro-boiler

- the chamber of the conveyer is washed without the presence of the operator, for example overnight; the system decalcifies the micro-boiler without the need for service intervention; the chamber is maintained in a constant 1% hygienic quality
- **Self-supporting shower**

drum winch integrated in the body of the kettle the shower is inaccessible when the door is closed

- allows food in the food processor to be rinsed out if necessary to speed up cooling
- Six-speed fan, reversible with automatic calculation of direction change

in cooperation with the symbiotic system, it ensures perfect steam distribution without losing its richness its operation is controlled by the program or manually

 allows the preparation of a variety of dishes from the most delicate to high temperature baking at the highest speed
