Model		SAP Code	000113	95
1	A symbiotic steam general simultaneous use of direct injer maintenance of 100% humidity – preparation of different dis an environment precisely s	ction and boiler, , or its regulation shes and cooking styles in	7	A kit of two machines on top of each other connection kit allowing two machines to be placed on top of each other connects the connections, inlets, wastes and ventilation of the lower combi oven
2	Digital display simple multi-line backlit displa cooking phases - help with cooking even for baking even in the absenc your own recipes; easy to b	less skilled cooks, safe e of an operator; create	8	 allows the user to place two machines in smaller spaces to increase production; the chef can prepare two different dishes simultaneously Premix burner the only burner with a turbo pre -mixing gas with air on the market the structure of the burner to V which prevents
3	Weather system patented device for measuring time and in steam mode, the or - precise information for the saturation in the cooking a	nly one on the market e operator about the steam	0	backfill and banging This design saves 30 % of gas compared to conventional burners – faster heat-up faster more comfortable operation Automatic washing
4	Steam tuner a control element that enables saturation of steam in the cook cooking process - possibility of cooking diffe very moist steam for typica saturated steam for e.g. Fre	ing chamber during the rent types of cuisine, from al Czech dishes to low-	9	 integrated chamber washing system possibility to use liquid and tablet detergents option to use vinegar as a rinse agent the system simultaneously descales the micro-boiler the chamber of the conveyer is washed without the presence of the operator, for example overnight; the system decalcifies the micro-boiler without the need for service intervention; the chamber is maintained is a constant 10(hypitalis quality)
5	Pass-through door the door is also built into the base while full control is retained fro enables the distribution of the and the kitchen - the chef can dispense the machine, the customer can maintenance of the food of	m the side of the cook delivery area food through the convecto n see the preparation and	10	 in a constant 1% hygienic quality Self -supporting shower drum winch integrated in the body of the kettle the shower is inaccessible when the door is closed allows food in the food processor to be rinsed out - if necessary to speed up cooling Six-speed fan, reversible with automatic
6	Adaptation for roasting cl the chamber of the convection baked fat, the machine is equip collecting fat - grease does not drain into destroy the machine's was	oven is designed to collect oped with a container for the sewer, does not	11	 calculation of direction change in cooperation with the symbiotic system, it ensures perfect steam distribution without losing its richness its operation is controlled by the program or manually
