1

#### Manual controls - Set values using rotary knobs

clear and simple user-friendly temperature settings

- quick and easy for the user to operate, no training required for operation long service life

2

#### Chamber heating in the temperature range of 50 to 450°C

the temperature range enables the preparation of various types of dough and meat; can also be used for baking

- we have a crispy pizza in a short time - I can make a pizza according to the dough, the customer does not wait long and the operator serves multiple customers - multiple turns in one oven

3

#### The device is powered from a regular 230v network

the device can be connected anywhere, in case of sufficient securing

- no need for sufficient costs if I do not have a 400V supply

4

#### Glass set in the door

checking the product during heat treatment without having to open the door

- I don't lose temperature when baking by unnecessarily opening the door without glass, saving energy

5

#### 2x thermostat, separate control of upper and lower heaters

more precise regulation of heat in the chamber, according to the type of dough or food

- better final quality of the product; no burning, variability - suitable for different treatments, better comfort for the experienced cook, suitable for professionals

6

#### Analog thermometer measuring the temperature in the chamber

certainty of the set temperature, I will check whether it is set correctly and that the device works correctly for me

- I am aware of and can react to deviations from the required temperatures
