## **Technical data sheet**

## Combi convection steam oven STEAMBOX electric 10x GN 1/1 touch screen direct steam 400 V Model **SAP Code** 00008615 **Direct injection** A kit of two machines on top of each other steam generation by spraying water on the heating connection kit allowing two machines to be placed on elements directly in the chamber top of each other connects the connections, inlets, wastes and ventilation - simple and efficient solution of the lower combi oven - moist steam with water droplets allows the user to place two machines in smaller spaces to increase production; the chef can prepare **Digital display** two different dishes simultaneously simple multi-line backlit display of 99 programs with 9 cooking phases **Premix burner** - help with cooking even for less skilled cooks, safe the only burner with a turbo pre -mixing gas with air baking even in the absence of an operator; create on the market your own recipes; easy to use the structure of the burner to V which prevents backfill and banging Weather system This design saves 30 % of gas compared to patented device for measuring steam saturation in real conventional burners time and in steam mode, the only one on the market - faster heat-up faster more comfortable operation - precise information for the operator about the steam saturation in the cooking area **Automatic washing** integrated chamber washing system Steam tuner possibility to use liquid and tablet detergents a control element that enables setting the exact option to use vinegar as a rinse agent saturation of steam in the cooking chamber during the the system simultaneously descales the micro-boiler cooking process - the chamber of the conveyer is washed without the possibility of cooking different types of cuisine, from presence of the operator, for example overnight; the very moist steam for typical Czech dishes to lowsystem decalcifies the micro-boiler without the need saturated steam for e.g. French cuisine for service intervention; the chamber is maintained in a constant 1% hygienic quality Pass-through door the door is also built into the back of the combi oven. Self -supporting shower 10 while full control is retained from the side of the cook drum winch integrated in the body of the kettle enables the distribution of the delivery area the shower is inaccessible when the door is closed and the kitchen - allows food in the food processor to be rinsed out - if - the chef can dispense the food through the convecto necessary to speed up cooling machine, the customer can see the preparation and maintenance of the food during dispensing Six-speed fan, reversible with automatic 11 calculation of direction change Adaptation for roasting chickens in cooperation with the symbiotic system, it ensures 6 the chamber of the convection oven is designed to collect perfect steam distribution without losing its richness baked fat, the machine is equipped with a container for its operation is controlled by the program or manually collecting fat - allows the preparation of a variety of dishes from - grease does not drain into the sewer, does not the most delicate to high temperature baking at the destroy the machine's waste system highest speed tel.: +420 381 582 284 e-mail: rmgastro@rmgastro.com 2025-01-16 web: www.rmgastro.com
