

Technical data sheet

Product features

High-capacity boiling kettle gas indirect 300 l with automatic water charge

Model	SAP Code	00019667
--------------	-----------------	----------

- Device type: Gas unit
- Device heating type: Indirect
- Ignition: Electric
- Steam pressure regulation: Automatic - the pressure switch regulates the performance of the device
- Filling: Mechanical cock
- Jacket filling: Automatic
- Drain valve diameter: 2"
- Basin volume [l]: 300
- Usable volume [l]: 280

SAP Code	00019667	Power gas [kW]	40.000
Net Width [mm]	1400	Type of gas	Natural gas, propane butane
Net Depth [mm]	928	Basin volume [l]	300
Net Height [mm]	900	Usable volume [l]	280
Net Weight [kg]	250.00	Device heating type	Indirect
Power electric [kW]	0.023	Steam pressure regulation	Automatic - the pressure switch regulates the performance of the device
Loading	230 V / 1N - 50 Hz

Technical data sheet

Product benefits

High-capacity boiling kettle gas indirect 300 l with automatic water charge

Model

SAP Code

00019667

1

Top cover in front panel design

thanks to the design, the lines of the front panel and the lid are unified, the designed design allows easy maintenance by the user

- thanks to the design, the condensate is drawn to the back of the lid, eliminating the risk of scalding the operator with hot condensate; the user saves time and energy when maintaining the product

2

Ergonomic extended handle

even people of smaller stature can comfortably lift the lid to the fully open state

- the operator will not be scalded by steam when the lid is raised to the fully open position.

3

Sloped bottom for the sink

the entire volume of the container will flow out without the need to carry the food to the sink

- no residual puddles on the bottom of the cooking vessel; eliminates losses when food is poured out of the cooking vessel

4

Reinforced bottom without deformations

thanks to the reinforcements in the intermediate shell, the service life of the duplicator is extended, there is no deformation due to heat and expansion of the material

- several times longer life of the cooking vessel, where the reinforcements prevent tearing or deformation; the user does not have to replace the product with a new one after years of use, thus saving costs

5

Spill-resistant design controls

ergonomically comfortable, preventing water from entering the device

- due to the sufficient coverage of the controls, water does not leak into the device, thus prolonging the life of the control or eliminating the potential risk of leakage into the functional components of the device

6

Lines in the container

the operator knows at a glance how much food is inside the cooking vessel

- time-saving for the product operator when filling water or measuring the total quantity of food to be prepared

7

Duplicator automatic venting

thanks to the integrated pressure switch, the pressure in the intermediate casing is automatically regulated

- the user can concentrate on food preparation or ingredients as he does not have to monitor the pressure in the intermediate vessel.

8

Automatic duplicator allowance

due to automatic filling/offering, the operator does not have to stand for the device to fill and check the boiler filling

- the user of the appliance can concentrate on the preparation work instead of watching the water level in the intermediate vessel. thanks to automatic draining, the risk of damage to the intermediate pan and heating elements due to missing liquid is eliminated.

9

Rotatable filling arm

convenient filling of the duplicator container, the hanger is used for maintenance and cleaning of the cooking container

- convenient filling and cleaning of the cooking vessel, but the hanger does not interfere with the cooking vessel, thanks to its position on the top plate

10

Integrated waste overflow

condensed water drains directly from the top plate

- elimination of the risk of the operator slipping on the wet floor; excess liquids are drained directly into the central waste and not in front of or under the equipment

11

Molded top plate

easier operation and cleanability, water does not flow over the edge on controls and service

the top plate retains its stiffness without deformation over time due to use

- operator safety when using the product, hygiene and strength of the equipment

Technical data sheet

Technical parameters

High-capacity boiling kettle gas indirect 300 l with automatic water charge

SAP Code

00019667

1. SAP Code:

00019667

2. Net Width [mm]:

1400

3. Net Depth [mm]:

928

4. Net Height [mm]:

900

5. Net Weight [kg]:

250.00

6. Gross Width [mm]:

1435

7. Gross depth [mm]:

1030

8. Gross Height [mm]:

1085

9. Gross Weight [kg]:

260.00

10. Device type:

Gas unit

11. Construction type of device:

Stationary

12. Power electric [kW]:

0.023

13. Loading:

230 V / 1N - 50 Hz

14. Power gas [kW]:

40.000

15. Ignition:

Electric

16. Type of gas:

Natural gas, propane butane

17. Protection of controls:

IPX4

18. Exterior color of the device:

Stainless steel

19. Material:

AISI 304 top plate and cladding

20. Indicators:

operation and warm-up

21. Drain valve diameter:

2"

22. Worktop type:

Molded - comfortable cleaning maintenance

23. Worktop material:

AISI 304

24. Worktop Thickness [mm]:

2.00

25. Surface finish:

polished stainless steel

26. Device heating type:

Indirect

27. Basin volume [l]:

300

28. Volume capacity of the container [l]:

300.00

Technical data sheet

Technical parameters

High-capacity boiling kettle gas indirect 300 l with automatic water charge

Model

SAP Code

00019667

29. Maximum device temperature [°C]:

100

30. Minimum device temperature [°C]:

30

31. Number of power control stages:

2

32. Safety element:

manometer, safety valve

33. Safety thermocouple:

Yes

34. Safety thermostat:

Yes

35. Safety thermostat up to x ° C:

150

36. Adjustable feet:

Yes

37. Bottom thickness:

2.50

38. Bottom material:

AISI 316

39. Type of pan:

Fixed

40. Usable volume [l]:

280

41. Filling:

Mechanical cock

42. Jacket filling:

Automatic

43. Basin shape:

Practically shaped bathtub spout to minimize spillage

44. Steam pressure regulation:

Automatic - the pressure switch regulates the performance of the device

45. Type of drain valve:

conical

46. Overflow:

Yes

47. Manometer:

Yes

48. Water filling type:

Cold

49. Connection to a ball valve:

1/2

50. Water supply connection:

1/2"
